

WAKE UP BITCHES!

Bahamadia's Top Ten Rappers

A FEW YEARS AGO EVERYONE WAS CHASING

Philledelph dwelling, afro-sporting rap queen Bahamadia. After rocking tightly precise laidback lyrics all over her first LP, hip hop's number one female shot into the spotlight with spots on The Roots' *Illadelph Halflife* and Reprazent's drum and bass masterpiece, *New Forms*. Since then she's been busy "reading, digging for beats and just chilling." Now she's got an EP about to drop and an insane album in the works with Tricky, The Prodigy, Guru, DJ Premier, Roni Size, and The Roots on board. Before she blows up all over again, *VICE* asked her who else everybody's sleeping on.

1. BAHAMADIA

Yeah, I'm definitely on the list. Me. I'm slept on because I just needed to get with the right management team and learn the business. A handful of people were checking for my last album but the masses

weren't ready for it.

2. KOOL KEITH

I think he's slept on because he's misunderstood.

3. O.C.

I don't know why O.C. would be slept on. He's just slept on just 'cause he is.
